WORK-STUDY RECRUITMENT ADVERTISEMENT: CODE WITH A SOCIAL IMPACT!

Position: Fullstack Application Designer & Developer (Work-Study Student M/F/X)

Company: Justellia

Contract: Work-study (Apprenticeship or Professional Training)

Duration: 12 months

Where? Hybrid Paris/Remote working

Start date: 2 January 2026

Who are we?

Justellia is a **very, very young mission-driven company** (or B2B start-up, you choose the label!), a software publisher with a passion for **Legal Tech**. Our flagship product is not just a simple web application: it is an essential tool for securing **the control of management reports for protected adults** (guardianship/curatorship).

Our mission is clear: to protect our most vulnerable citizens by offering professionals a simple and reliable technical solution. We make tech that makes sense, period.

Your mission: Code the evolution of Justellia!

We are looking for our **future talented Web Developer Intern (M/F/X)**. As part of our small team of geniuses (yes, really!), you will actively participate in the construction, evolution and maintenance of Justellia.

Your role is **crucial**, as you will be developing features that will have a direct and positive impact on the daily lives of social workers and vulnerable individuals.

What you will achieve (and much more if you feel like it!):

Area	Key Tasks	The Stack
Frontend	* Design and implementation of new user interfaces. * Optimisation of ergonomics, performance and a flawless user experience.	**React and Mantine UI** (for interfaces that shine).
Backend	* Design and development of robust and scalable APIs. * Powerful database management and query optimisation.	**AdonisJS, Inertia and PostgreSQL** (for a solid foundation).
Fullstack	* The best of both worlds: participation in front-end and back-end tasks.	

The profile we dream of welcoming

We are looking for **an aspiring Application Designe**r who has stars in their eyes and code in their blood.

- **Education**: Student with a **bachelor's or master's degree** (university, engineering school, post-core curriculum at École 42 or equivalent) in computer science or web development.
- **Languages you have mastered (or want to master)**: Expertise in **JavaScript** and **TypeScrip**t is desirable.
- **Social Appetite**: You must have a **genuine and sincere appetite for protecting our most vulnerable citizens**. Our co-founders' area of expertise makes this commitment a non-negotiable prerequisite.
- **That little something extra (are you a five-legged sheep?)**:
    o Knowledge of **cybersecurity** (secure development).
    o Familiarity with containerisation (**Docker**).
    o Basic knowledge of infrastructure automation (**Ansible**).
- **Interpersonal Skills (Your Superpowers)**: Autonomy, rigour, team spirit, and above all, an insatiable technical curiosity.

Why is Justellia your next screensaver?

1. **Guaranteed impact**: Code for a mission-driven company, not a soulless multinational. Your work has real and noble meaning.
2. **Learning**: A real, complex project with a team that will be there to answer your questions.
3. **Inclusive & Caring Culture**: At Justellia, we are committed to diversity and inclusion. We encourage all applications (M/F/X) and believe that the diversity of our team is our greatest strength.
4. **Your benefits (the 'must-haves')**:
    o Coverage of your tuition fees related to work-study programmes.
    o Remuneration in accordance with current legislation (minimum wage or minimum monthly wage).
    o Benefits such as meal vouchers, 50% of transport costs covered.

Application: Prove your worth to us!

Are you that rare gem who is not (yet) aware of their value and thinks we are little tech geniuses? Come and see for yourself!

Send us: Your CV and a cover letter (or email) explaining your interest in our social mission, your technical skills and the pace of your work-study programme. The first interview will be conducted by telephone.

Application email: candidature@justellia.fr
